

TECHNOLOGY TODAY

SA is taking advantage of the latest technology to provide more efficient methods for federal employees to research and procure products and services. Linked to resource databases, the FSS website brings together information such as product features, contract specifications, procurement regulations, etc., to insure efficient identification and procurement of materials.

GSA's technological advancements have not only linked valuable information, but have extended into e-commerce with an Internet-based shopping service. In addition to the actual procurement procedures, this system allows for recording, tracking, and controlling of the nationwide inventory.

E-COMMERCE

GSA Advantage!

SA's Federal Supply Service uses information technology to create an "award-winning" ecommerce shopping site for ordering supplies and services, GSA Advantage!, located on the web at www.gsaAdvantage.GOV.

GSA Advantage! is a shopping service available exclusively for authorized federal government users. It provides access to over a million commercial products and services available from GSA. Using a powerful search engine, GSA Advantage! allows users to search for products by manufacturer name or part number, product name, product description, vendor name, contract name, or National Stock Number (NSN). Search results are displayed in a scrollable product listing format.

GSA Advantage! has utility for ALL federal employees! Even if you're not a purchasing agent, users may "window shop". By using "Browse/Search" option at the sign-on screen, users may search for products, create a shopping cart and then "park" (save) the shopping cart to be retrieved later by their purchasing agent.

GSA Advantage! also supports users with customer service representatives. Simply "click" to request a "call back" to assist with your product search.

In today's fast paced work environment, FSS recognized the need for federal employees to quickly interpret product information and acquire materials and services to perform their jobs. **GSA** *Advantage!* is an excellent example of how FSS has used information technology to improve the government procurement process.

E-COMMERCE

ITMS is on the Web

SA will soon launch the Interagency Transportation Management System (ITMS) onto the Internet. After approximately 5 years of distributing rate and routing information for both GSA's freight and household good programs, a giant leap has been taken to move these programs to the Web. This will result in a phasing out of distributing the ITMS CD-ROM. For transportation offices that have been receiving ITMS via a CD-ROM, you will also have access to ITMS on the Web by using your current user ID and password. For transportation offices that are currently receiving rate and routing information by some other means, you will have immediate access to rate and routing information via ITMS by GSA assigning a specific ID and password for your specific office.

Whether you are a transportation novice or expert, ITMS now offers you the tools you need to get professional results at your own computer terminal. Just think...no more faxing, mailing, or waiting for responses.

For more freight information, contact
Robyn Bennett
For more household goods information,
contact
Carla Young
Phone (816) 823-3646
Fax (816) 823-3656
E-mail robyn.bennett@gsa.gov or
carla.young@gsa.gov

Schedules E-Library

chedules E-Library is your source for the latest FSS schedules contract award information. It contains basic ordering guidelines, complete schedule listings, and a powerful search engine which allows you to search by keyword text, schedule number, special item number, and contractor name or number.

The Schedules E-Library can be accessed from the GSA Advantage! main menu or directly at www.fss.gsa.gov/schedules.

IT Contractor Database

overnment employees can search the latest information technology products & services offered by FSS. A powerful search engine allows users to retrieve information based on product/service feature, vendor name, or contract number. This database can be assessed via our IT Acquisition Center's website at www.fss.gsa.gov/it/customerinfo.cfm.

TECHNOLOGY PRODUCTS AND SERVICES

Highlights: Here's a small sampling of the vast listing of products and services on schedule and available through the GSA.

SECURITY TECHNOLOGY

hether it's building security or computer network security, GSA can help your agency with the following security technology products:

- Surveillance and Detection Equipment
- Information Assurance Software
- Financial Management Services Software

IT PRODUCTS AND SERVICES

DOCUMENT MANAGEMENT

SA has established agreements with top vendors to supply quality computers and computer-related products and services, including:

- Hardware
- Software
- Equipment & Software for the Physically Challenged
- IT Services
- Equipment/Software Maintenance
- Telecommunications Equipment
- Mobile Information Technology
- Desktop Management

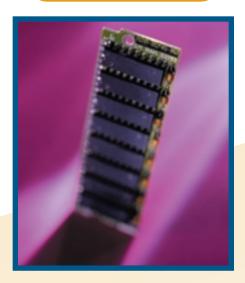

FURNITURE TECHNOLOGY

he GSA National Furniture Center partners with the world's leading suppliers of furniture and furnishing to provide the highest quality products and services at competitive prices. The latest in furniture technology offered by GSA includes:

- Computer Workstation
- Mobile Office Furniture ideal for temporary work situations. They are portable and durable while still offering full-function workstations capability.
- Classroom and Conference Furniture including storage units, students desks & chairs, conference tables & chairs, lecterns, etc.

SA has a wide selection of document management and information technology services including:

Document Management

- Document Production
- Document Conversion
- Records Management
- Document Support
- Document Shredding

For more information about GSA's products and services visit our website at www.fss.gsa.gov.

OFFICE TECHNOLOGY PRODUCTS

SA offers the latest in technology products for your office, including computer media supplies & storage, antiglare screens, mousepads, keyboard tray etc.

Computer Media Supplies:

New Ergonomic Writing Instrument

New Ballpoint Pen Focuses on Ergonomics

he new EzGrip, Pen departs from usual writing instrument design. It has more curves and bumps than you might expect, and it offers a little something extra for people with writing problems. The writer is given a choice of fingers for use, and a "nosqueezing" approach to writing. In a pilot study completed at the Cleveland Clinic, the EzGrip Pen results indicated it could be more beneficial for persons who do a lot of writing and for those that have certain forms of manual difficulty.

Dexterity Technologies Corp., Southampton, PA, developed the patented EzGrip Ballpoint Pen working with Occupational and Physical Therapists. Departing from standard designs, it has a finger-hugging support shelf for direct downward pressure and coupled with its curved surfaces, prevents fingerslip regardless of how lightly it is held — a problem encountered with ordinary pens. With its support ledge, only a single finger — fingertip, thumb, or knuckle — is needed for writing pressure. The user can switch fingers at any time for comfort, or variety.

To further prove its capability, a pilot study on writing instruments was completed through the Cleveland Clinic Foundation. Dr. Brian Davis conducted the testing at the Lerner Research Center for Biomedical Engineering. The purpose of the pilot study was to discover if there are advantages in one pen design over another that will aid persons with repetitive stress injuries, and help prevent cramping and finger problems. In the study, several ballpoint pen designs were compared: 1) A standard retractable pen, 2) an ergonomic pen with a contoured rubber sleeve, and 3) an ergonomic pen with a contoured shape and a finger support ledge, the EzGrip Pen.

Study participants were male and female, right and left-handed. The results showed that the pen with the Finger Ledge (EzGrip Pen) is 40% more stable and consistent in use. It requires 7% less force. It is 50% more controllable than a standard pen with 1.25 pounds of downward pressure applied to the point, and requires only one finger to accomplish this.

The results suggest that the pen with the finger support ledge (EzGrip Pen) could enable people to write longer with less effort and could ultimately be easier to use by persons with hand difficulties such as arthritis and "writer's cramp." Further studies are currently in progress.

The ergonomically-designed pen barrel is burgundy and black and writes in black ink. It is not refillable.

PUBLISHED PRODUCTS

 Books, Software, Tapes and Reference Material

ooks & Research, Inc. is a one-stop, time-efficient, and cost-effective source for purchasing books, software, tapes, audio visual material, books on tape, CD ROM's, and software games — all available through Federal Supply Schedule 76.

These items can be purchased in single or multiple copies, often at better than market prices because Books & Research buys in bulk, works with a variety of book jobbers, has special arrangements with publishers, and has a low overhead. As a small company that can give individual attention to its customers, their services include finding and compiling training material and reference books for offices and libraries, patient information literature for hospitals, and textbooks for medical schools.

Books & Research can tailor its services to your needs. For instance, it can help select books for leisure reading or training materials and then ship them to customers around the world. As a single source for ordering, they can not only buy in volume at discount prices, but can get hard-to-find material from small publishers and presses. They can even find out-of-print books through contacts with used book dealers or directly with authors.

Books & Research also does information brokering. Using old-fashioned customized research that is both extensive and thorough, they will pull together information from various commercial databases, libraries, telephone interviews, and other sources, and summarize this material into more easily readable reports that are accompanied by documentation.

Books & Research is a woman-owned small business organization.

PUBLISHED PRODUCTS (CONT'D.)

 Computer Software and Books At Your Fingertips

he largest library of PC software, manuals and books you can imagine are only a few keyboard taps away at **bn.com**. That's the E-commerce address of barnesandnoble.com – one of the Internet's largest booksellers – and your best source for computer texts and so many other business, learning, and reference needs.

It's easy to log in! After accessing **bn.com** through

www.gsaAdvantage.gov, select either the Professional & Technical Store or the Software Store for listings of their seemingly limitless inventory.

In the Software Store, you'll find more than 300 titles like Microsoft Money, Microsoft Works 2,000, Business Plan Pro 4.1, and Naturally Speaking. It's the best Internet source for helping you upgrade computer capabilities and users' skills. They have software and book titles covering certification, database management, graphics, networking, operating systems, programming, and repair. Everything you need for electronic and communication management plus the latest software releases from productivity to desktop publishing.

The Professional and Technical Store features 250 titles in the popular "...for Dummies" series, plus books on

accounting, management, marketing, and finance, to name just a few categories. You will have access to books on engineering, civil, electrical industrial and mechanical; medical, including nursing and all the health-related professions; law, covering texts on business law, civil law, constitutional law and criminal law, and a rich selection of reference books of all kinds for individual study and office libraries.

Agencies can benefit from major savings on the entire 1 million-item booklist and on software and music at barnesandnoble.com when using the GSA SmartPay government purchase card through Schedule 76. In addition to the heavily discounted prices that barnesandnoble.com offers, SmartPay cardholders are *not charged* for shipping and handling. (Others pay \$3.00 per order, plus \$.95 per item).

Barnesandnoble.com is a great reference source for book title hunting, and most importantly, it offers real savings for individual offices, research centers, schools, day rooms, and lending libraries. Note: Purchases are for government business only.

TECHNOLOGY TRAINING

 GSA Quality Computer Training...When and Where You Want it

SA recognizes the need for keeping computer equipment and personnel current with the latest software upgrades and developments. To help, GSA has a large roster of highly capable training partners in Federal Supply Schedule 69. They counsel and conduct courses on their premises, at conveniently located training sites, on clients' premises, and in some cases, offer self-directed courses using CD-ROM disks and videotape. Below are descriptions of just a few.

DPEC, Inc.

450 West Wilson Bridge Road Worthington, OH Phone: (614) 457-0577 Fax: (614) 781-6510 Contact Will Fleshman Contract #GS 02F-9408C

DPEC's MindLeaders Division offers over 400 courses in an HTML format that communicate efficiently over the Internet or networks using regular browsers. Topics include mainframe, client/server, end-user, and professional development. Courses include multistep task-based simulations and skill assessments to replicate the actual application. Hyperlinked topics and an

index in each course allow the student to browse through the courses and quickly find the nugget of information they need.

Courses include a glossary defining technical terms, sample hands-on exercises, and live coding examples that can be modified, compiled and run. Students can peruse the master index to locate topics in other courses and instantly jump to them for additional information. An on-line instructor is available to answer student questions via e-mail. The free web administration tool allows an administrator to coordinate and report on a worldwide program from a single location. Courses and skill assessment are customizable on client hosted installations.

MindLeaders is a Microsoft Approved Independent Courseware Vendor and offer MCSE, MCP and MOUS curriculums.

MaxIt brings you the following:

Desk Top Training CBT Software is fully interactive multimedia based training for all of your standard Office suite applications up to and including MS Office 97. This training provides a simple modularized approach. Each subject is broken up into 8 to 10 lessons. Each lesson is from 30 minutes to 90 minutes in length depending on the subject, followed by a 10-question quiz - plus a final exam at the end of each program. The training also allows for pre-testing and will provide a learning path based on the pretest results. There is also an optional administrator available that will track all quiz and test results as well as user usage in various formats. The administrator will also print a certificate of completion for each course finished.

EZ Tracker 4.5 is an affordable software package that addresses the specific need of keeping track of employees and their scheduled, completed and in progress training. The software offers many unique features and reporting capabilities that make it easy to see who has been trained, who needs to be trained, and who is in training. Its many reports help to create audit trails to document that employees have had required orientation or sensitive training to ensure compliance with regulations. The software will work with any OBDC

compliant database. The majority of our customers currently use it with Access, although we also have a few Oracle and SQL installations, as well.

NETg

1751 West Diehl Road Naperville, IL 60563 Website: www.netg.com. Contacts: Kim Markovich (630) 637-8815 Bill Bonner (630) 637-8924 Contract # GS 02F-0429D

NETg®, a global leader in technologybased training (TBT), delivers true Anytime, Anywhere Learning™. NETg's Skill Builder® courses run from end-user applications to professional developer topics, offering your choice from among over 4,000 hours of learning! Choose CD-ROM, LAN or Web-based delivery of NETg's scientifically proven instruction material. NETg's Skill Builder courses are uniquely designed using NETg Learning Objects[™] (NLO) to enable easy and fast delivery and best use of bandwidth. As a leader in technology training innovation, NETg's Skill Builder courses offer advanced delivery, learner features and tracking capabilities. They have a portfolio of over 600 multimedia courses in several languages, covering professional IT, desktop and personal development skills and serving over 2000 customers worldwide.

NETg's Skill Builder courses are designed to 'build skills' successfully: Preassessments, simulations, and considered use of multimedia all combine to create proven quality TBT. NETg courses are modular in structure, with each course comprised of several NETg Learning Objects (NLOs). Each

NLO teaches a specific skill and can exist independently from the course enabling customers to 'mix and match' objects from different courses and create hybrid courses that truly meet the learner's needs. This structure also facilitates just-in-time learning, giving learners the ability to access an object and learn a single skill at the time that they need it. NETg is at the cutting-edge of online learning, focusing on providing quality courses that enable employees and individuals to learn the skills they need anytime, anywhere.

What's in a name? In our case, a lot.
We're Pearson Technology Group.
That's the collective new name for some familiar faces: Macmillan USA,
Addison-Wesley, and Prentice Hall
PTR. Macmillan, AW, and PTR joined forces in 1999 to create Pearson
Technology Group (PTG), now the world's largest provider of information technology reference and training resources.

PTG includes Que, Sams, New Riders, Cisco Press, Prentice Hall PTR, Addison-Wesley Professional, Peachpit Press, Adobe Press, and informIT.com. Ask us about our Electronic Reference Library and Que Learning Systems.

Teach.com is a leading provider of e-Learning solutions for workers in Global 2000 companies, government, and educational institutions. Teach.com courseware covers Desktop Application skills (e.g., Microsoft Office, Lotus, and web browsers) and Management/Supervisory skills, (Leadership, Motivation, Personal Effectiveness, Project Management, Sales and Customer Service).
Teach.com offers award-winning multimedia courseware through its
SmartTrainer® product line.

Teach.com's e-Learning solutions and instructional technology give clients access to courseware anytime, anywhere, and on any platform. Teach.com's mission is to provide e-Learning solutions that improve productivity.

Teach.com's SmartTrainer courseware utilizes proven learning methods specifically targeted for the way adults like to learn. Users see how to perform a specific action and then have the opportunity to try it themselves in either a simulated or, in most cases, a live setting within the application. Also, each course has pre- and post-assessment exercises that create customized prescriptions so that users learn only what they need to know.

Another key feature of SmartTrainer is its scalable media, which utilizes three flexible delivery modes: Rich text and graphics mode when audio and video presentation technologies are not available on PCs; audio, text and graphics mode when full-motion video is not available; and multimedia which deliver full-motion video, audio, and rich text and graphics.
